	APPROVAL OF STATE ENGINEER		
	This permit is issued subject to existing rights. It is understood that amount of water herein granted is only a temporary allowance and that the final was right obtained under this permit will be dependent upon the amount of water acturated to beneficial use. It is also understood that this right must allow for reasonable lowering of the static water level. This well shall be equipped with two (2) inch opening for measuring depth to water. If the well is flowing, a variety must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion accurate measurements must be kept of water placed to beneficial use. The totalismeter must be installed before any use of water begins, or before the Proof Completion of Work is filed. This source is located within an area designate the State Engineer, pursuant to NRS 534.030. The State retains the right to regulate the state Engineer, pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times. This permit does not extend the permittee the right of ingress and egres public, private or corporate lands. The well must be sealed with cement grout, concrete grout or neat cement ground level to 100 feet. The issuance of this permit does not waive the requirements that the perholder obtain other permits from State, Federal and local agencies.	rater pally for a th a valve t be n and zing f of ed by slate ss on from
